You : China's who are we overtook, Samsung Electronics as the world's biggest seller of mobile phones in second quarter of 2020, shipping 55.8 devices compared to Samsung's 53.7 million. According to data from research firm can lease While Huawei sales fell 5% from the same quarter a year earlier South Korea, Samsung posted a bigger drop of 30% owing to disruption from the coronavirus in key markets such as Brazil The United States and Europe can least said. Huawei's overseas shipment fell 27% in quarter to from a year earlier, but the company increased, its dominance of the China market which has been faster to recover from Covid-19 and where it now sells over 70% of its phones.

Aman Shah 27 : Our business has been demonstrated exceptionally resilience in these difficult times. A Huawei spoke person said. Amidst a period's period of unprecedented. Global economic slowdown and challenges. We are continued to grow and further our leadership position. Nevertheless huawei's position as number one seller. May prove short-lived. Once other marks markets recover, given it is mainly due to economic disruption, a senior Huawei employee with knowledge of the matter told
